- H.264 - FULL D1 - Best Recording Image Quality Available
- 8 Sony Night Vision Cameras
- Built-In Motion Detection and Email Notification
- Watch Remotely, Anywhere In The World
- Record Months Of Video
- Backup Directly To DVD-RW
- 8 Input Sensors, 1 Output

Full D1 H.264 Compression Technology Provides Longest Recording Times And Uses Less Hard Drive Space

The 8 Channel H.264 Pro DVR utilizes the H.264 video compression technology to fully optimize video signals using a DSP algorithm real-time. The results are flawless images and synchronized sound regardless of how many channels are being used at the same time. The H.264 codec used by the 8 Channel H.264 Pro DVR was designed by a security professional with the pinnacle of security in mind. Experience the power of H.264. Seeing and hearing your video will truly be an amazing experience for you!

Live Display, Record, Backup, Playback And Network Access At The Same Time

Live display provides Full D1, Full Motion (30fps) per channel at all times. Display and record your hi-quality video remotely. This 8 Channel Surveillance System w/ network monitoring is the best all-in-one surveillance system on the market today. Featuring 8 high resolution cameras, H.264 video compression and a built-in DVR, you can effectively monitor an entire property or multiple business points day or night. Auto-start recording ensures that this system will automatically begin recording as soon as you plug it into a power outlet. You can easily monitor entryways, lunch rooms, children's rooms, garages, home offices, shops or any other area in your business or home. Connect the DVR and set it up with the included software. You can view your live cameras watch recorded video footage, and more. With everything included, this is the only product you need to effectively monitor your property or business.

Built-In Fail-Safe And Alert System Keeps You Informed

This system will notify you instantly of all events via Email in the event of Power Loss, Motion Detection, Alarm or Video Loss.

Full Featured Event Recording Modes: Motion Detection, Scheduled, Alarm & More

This customizable DVR is designed to meet your specific security needs. Recording methods include: motion-activation, manual, scheduled, alarm, and remote. Motion-activated and scheduled recording only record when action is detected so you will not have to sift through hours of useless video. With a built-in hard drive, you never have to worry about missing an important moment. This DVR automatically starts recording before the alarm goes off for an added level of security.

Watermark Secured Images Provide Proof In Court

By using the time/date Watermark Proof feature, your files can be as Permissible Evidence in Court. Watermarking superimposes the current date/time in the lower corner of your recorded video.

Connect Up To 4 I/O Devices For Sensors & Alarms

The built in I/O ports allow you to easily connect up to 4 window or door sensors to trigger Email or Instant Recording. The intelligent recording actually buffers the video before the incident occurs, effectively pulling video out of the history buffer. Alternatively, video will still record for a period of time after the action so nothing is missed.
