

## AUDIO/VIDEO CONVERSION SERVICES

Our Mission: ABS Technologies provides high quality customer service and affordable prices that are among some of the most competitive in the industry.

### AUDIO

Cassette

Vinyl and 78's

### VIDEO

MiniDV, Mini DV Cam, HDV

Video 8, HI 8, Digital 8

VHS, Super VHS (S-VHS)

### HOW DO I BEGIN?

1. Place your order
2. Ship your media
3. Watch and enjoy

There are two options to get more information and/or get started on your media conversion project. You can call to speak with one of our representatives, or fill out our online request form to get a price quote.

### FREE CONSULTATION

ABS Technologies audio and video conversion services can take your existing analog (tape) formats and convert them to just about any digital (electronic file) format for lifetime storage, streaming media, and/or other DVD applications.

If you were an early-adopter of audio and video -- like us -- then you probably have a significant amount of media trapped in an analog world.

Perhaps in the past, you used a number of analog recording devices, for personal and/or business purposes. For example: have you ever captured memorable moments of your children growing up? How about your daughter or son's wedding day? Maybe you used your old recording devices for business purposes to capture training sessions, seminar, or even presentations, and now you are no longer able to play this media on today's electronics devices.

So what are you waiting for? Please fill out and submit the request form on our website and one of our representatives will contact you to discuss your media conversion project.

### SHIPPING SERVICES

Simply ship your media to ABS and we will ship them back to you after they have been converted using one of two shippers - UPS or FedEx.

### Test Drive Our 2GB MP3/MP4 Player

Take your entertainment with you! Tote around everything including movies and music with this low-cost Portable Media Player. Call for Details.
