

PUBLIC WIRELESS INTERNET ACCESS

GET COMPETITIVE TODAY !

ABS Technologies offers WiFi Internet Access to help keep employees in touch across the corporate campus and around the world! Our WiFi Internet Access is designed for:

- *Café's & Restaurants*
- *Camps/Campgrounds*
- *Conference Centers*
- *Shopping Malls*
- *Office Suites*
- *Food Courts*
- *Schools*
- *And More*

You determine what to charge and how long to allow access.

You keep 100% of the revenue.

No per user licensing fee or hosting fees.

More than 483 million wireless devices were sold to end-users in 2003, and one-third of the world's population will own a wireless device by the year 2008, according to The Strategies Group.

HOW DOES WiFi WORK?

ABS Technologies offer you a complete solution. Our service and equipment provides you seamless integration allowing you full control of who has access to the Internet on the premises and for how long.

You can create an access code for customers that will provide them access based upon subscription length purchased. You can also create different categories of tickets. For example: you can offer 30 free minutes of Internet Access with the purchase of each meal, and sell 1-hour of Internet Access for \$1 or an all month pass for \$10. All parameters of the *Ticket Manager System* are up to you: the price, expiration date, and the amount of time allowed online.

Would you like to quickly:

differentiate yourself from the competition?

increase traffic to your facility?

add state-of-the-art services for your customers?

CONNECTING TO WiFi

Wireless Access Points, or *hotspots*, are placed throughout your facility. These access points emit safe radio signals, enabling any WiFi equipment to communicate with them anywhere within a 300 to 500 foot range of the access device.

Newer laptop standards are compatible with WiFi technology. Older laptops need only to add a credit-card size PC Card to take advantage of using your *hotspots*.

Using any web browser, your guest will automatically be redirected to a login page that prompts them for their access code. The login page can also be customized with your company or organization branding and any message you want to express to your customers and or guests.
